US Educational Technology Purchasing Alliance (USETPA)

July 7, 2020

Request for Proposals

Notice to Proposers of Terms and Conditions

This RFP is co-authored by Lake Bluff School District 65 (IL), and the USETPA on behalf of its subscriber institutions. The USETPA and the above-mentioned schools are not currently seeking any goods or services but are conducting this bid for the purpose of accelerating public funding and obtaining advantageous pricing. Any questions regarding the RFP must be made by email (info@usetpa.com) to the USETPA. **Directly contacting any coauthored entity will result in disqualification from the bidding process.** Any questions regarding the RFP must be made by email (info@usetpa.com) to the USETPA, not the sponsoring public entity.

The US Educational Technology Purchasing Alliance (USETPA) is non-profit issuing contracts on behalf of a consortium of Subscribers (schools/school systems/libraries/Head Start Agencies/local government units/community colleges/higher educational institutions and other public entities) to obtain the best available pricing for goods/services to be purchased by the Subscribers. The USETPA has Subscribers in multiple states. The contracts issued by the consortium are used both for securing government funding and for Convenience Contract purposes. The contracts are managed on behalf of the USETPA and its subscribers by Consortia Purchasing Advisors, LLC.

The Universal Service Fund's E-Rate program supports schools, libraries, and hospitals in obtaining telecommunication, broadband services and broadband/networking equipment. In order to assist E-Rate eligible entities in streamlining the process, FCC Form 470 #210000033 has been issued contemporaneously with this RFP. Schools and libraries who have formally subscribed to the USETPA and have given the USETPA authorization to seek bids on their behalf are listed on the aforementioned Form 470. A copy of the 470 may be found at www.usac.org/sl. An additional Form 470, updating the list of subscribers, will be issued no later than Jan 2 of every year during the term of this contract. All subscribers listed on a Form 470 will have the option of using that Form 470 (28 days after the issuance of the applicable 470) during the E-Rate application process in order to streamline their procurement process.

While only subscriber E-Rate eligible entities will be able to reference the applicable Form 470 for E-Rate application purposes, it is the express intention of the issuing entities that the

terms and conditions of this RFP will be made available for cooperative use to all schools, libraries and other public agencies for entities within and without the same states of current USETPA subscribers. In order to qualify for use under the terms and conditions of this contract, individual purchases **must be registered** with the USETPA as outlined on the USETPA website (www.usetpa.org).

Vendors may have geographical limitations to their response. Appendix G must be completed to indicate in which states the response is to be considered valid. Vendors may further separate pricing into multiple geographic responses if there is a cause for a pricing variance. Please explain, in detail, the reasons in the RFP response.

It is also understood that state and local procurement law(s) as well as subscriber preference(s), can dictate that users of convenience contracts select firms that have distribution/licensing/registration and/or sales and service facilities located within their home state. Appendix G also requires that respondents indicate in which states a physical presence is maintained.

Co-authored by the US Educational Technology Purchasing Alliance. (Any questions regarding the RFP must be made by email (info@usetpa.com) to the USETPA; directly as contacting these school districts will result in disqualification from the bidding process). Cloud Computing: Contracts

Pricing:

The contract should include specific price caps to eliminate ballooning costs after the initial investment. For example, a fee increase cap of 3% is commonly used in such contracts, along with a provision to ensure that if the service is offered to other customers at a lower cost, the government will receive that lowest cost pricing. Note: Monitoring the pricing will be incumbent on the government entity and can be facilitated through regular review of government contracts with the cloud provider, as well as communication among peer governments. Review of pricing for nongovernmental entities will be difficult.

Data Assurances:

- 1. Ownership:** The contract should clearly state that the government owns all data residing within the cloud environment. Typically, the contract language will include rights to government data ownership related to issues such as intellectual property as well as disallow accessing the data for corporate gain by the cloud provider or organizations other than the government.
- 2. Access to Data:** The contract should mandate that the government be able to access and retrieve its data stored in the cloud at its sole discretion. The government should have the right to access all data, regardless of who created the content and for what purpose, in order to ensure that individual governmental employees cannot prevent access to data that would have traditionally resided on governmental servers, etc. Furthermore, the contract should specify how the data will be retrieved from the cloud in the event of an emergency or time sensitive situation, with specific procedures and timelines noted. In all cases involving data access and retrieval requests, the contract should specify the process by which the government will validate the request, including positions within the government authorized to make such a request and to whom within the cloud provider.
- 3. Disposition of Data Upon Request:** The contract should provide a mechanism for the government to require the cloud provider to destroy specified records as requested. The purpose of this mechanism is to allow the government to destroy records when allowed by law (i.e. according to the retention schedule) and not have additional copies of the records residing in other locations, such as the cloud, then making the records subject to disclosure upon public records requests or in the event of litigation.

- 4. Disposition of Data Upon Contract Termination:** The contract should provide clear instructions on how government data will be returned or retrieved in the event of contract termination. It is important to include the timeframe for such provision of all data, the process, and the exact format of the data. It is important to note that most cloud services involve proprietary or non-standard formats of data, which upon exporting to the government, would render it useless. Therefore, the contract should specify a common format for data return/retrieval, such as XML. The contract should also include specifications requiring the vendor to destroy all government data after contract termination, along with the government's right to conduct an audit to ensure the data has been destroyed.
- 5. Data Breaches:** The contract should specify the cloud vendor's obligations in the event of data breach or unauthorized access. It is important to include reporting/notification requirements related to the breach within a specified timeline, as well as details about the breach such as its nature, the data compromised, the involved parties, mitigation efforts, and corrective actions to be taken by the vendor. The contract should also specify indemnification in the event of the breach, as the data breach relates to specific legal, regulatory, and operating agreement provisions. In other words, the cloud provider should be responsible for all damages, fines, etc. including litigation costs related to a breach. Many cloud providers avoid putting this type of language in their contracts, which makes the government liable for costs associated with breaches.
- 6. Data Storage Location:** The legal system cannot keep pace with technology and, currently, most courts are holding that the legal jurisdiction over a contract dispute involving data takes place in the state where the data physically resides. North Carolina has a law (G.S. 22B-3) which voids contract provisions that require disputes under the contract to be litigated outside of the state, but it is important to consider the inclusion of statements about the physical storage location of government data (particularly requiring the data to remain within the United States).
- 7. Legal Data Holds/Public Record Requests:** The contract should include provisions related to litigation holds on data (also called litigation cooperation clause). First, the contract should specify the communication process for informing either the cloud provider or the government of any legal requests (including public records requests), as well as mechanisms to ensure that the data is preserved in its entirety during the duration of the litigation. A legal hold also requires maintaining any media that was used for backup of the data which must be available for searching. Furthermore, the contract should specify that the cloud provider will not provide data to individuals, groups, or organizations making records requests unless directed to do so by an authorized government official. The contract should also include a provision indicated the process by which the data requested will be reviewed and potentially redacted or removed from provision by authorized government officials, in order to ensure compliance with General Statutes.

Right to Audit and Inspect:

There are multiple audit formats to be specified in the contract

1. The government entity has the right to request third-party audits and/or certifications related to infrastructure and security, including penetration testing and vulnerability assessments. In addition, any reports produced from these audits and certifications will be provided to the government entity for review.
2. The government entity (or a third-party provider selected by the government) has a right to perform an onsite inspection of the cloud vendor's infrastructure and security practices on a specified basis.
3. The government entity has the right to review the infrastructure and security specifications in written format if it so chooses.
4. The government entity should have a right to audit the performance records of the cloud provider, as well as access to daily and weekly service quality statistics.

Service Level Agreements: The contract should specify service level parameters, minimum levels, and specific remedies and penalties for noncompliance with SLAs. Always include

1. Uptime
2. Performance and response time
3. Error correction time, and
4. Infrastructure and security. Ensure that the SLA clearly defines the pertinent terms, such as downtime, scheduled downtime, etc. These definitions eliminate ambiguity in contract enforcement, as well as provide specific mechanisms for calculating compliance with the SLA

Remediation/Penalties: Remedies for violation of the SLA should include corrections and/or penalties. Both corrections and penalties should be specific (such as "Service credit will be rendered when SLA is not met by XX Vendor. The service credit will be applied as liquidated damages against the following quarter of service costs." It is important to document how the credit will be provided and when it will be provided. Ideally, the financial penalty should be 10-20 percent of the contract, per Gartner, in order to motivate the vendor to avoid violations. These penalties should be related to SLA performance, while fines and costs associated with data breaches should be covered under the Data Assurances section of the contract.

Disaster Recovery/Business Continuity The contract should specify minimum disaster recovery and business continuity requirements and ensure that the cloud provider meets the minimums through inspection of documentation, etc. Furthermore, the contract should specify penalties for failures in complying with the minimum requirements, as discovered through onsite inspections, audits, or actual disasters.

Outsourced Services The contract should require the vendor to inform the government of any outsourced functionality and its provider. The contract should also require the cloud vendor with whom with contract is signed to remain directly responsible for all terms of the contract, regardless of outsourced functions. The contract should also specify that no assignment of the contract or components of the contract can occur without explicit, written agreement from the government entity.

Termination The contract should state that the government entity can terminate the contract “at any time without having to show cause and without additional fees or penalties.” The contract should require the cloud provider to provide advance notice at a set time, e.g., 60 days before service discontinuation. As previously noted, the contract should specify how data will be retrieved/returned upon termination by either party. Escrow language should also be considered in the event of a cloud vendor going out of business.

Exceptions: The LPA/PPA may modify/waive/delete any or all of the above stipulations in the negotiation of any contract. If the LPA/PPA does not waive, modify or add additional stipulations, the above stipulations are mandatory involving any contract concerning data movement off premise between of the LPA/PPA through any means specified by the Vendor/Cloud Vendor.

Appendix I: USETPA Fees

USETPA FEES: In order to maintain and enhance the quality and quantity of USETPA contracts, all vendors agree to pay a 1.0-1.75% fee of all purchases made by the Subscribers to the Consortia Purchasing Advisors, LLC (CPA) for expenses related to the maintenance and management of the USETPA. This 1.0-1.75% fee is not to be included in the pricing structure submitted for the bid. USETPA Subscribers may not be charged this fee in any manner.

- Vendor shall pay the USETPA Administrative Fee in the amount of one to one and three fourths percent (1.0-1.75%) in accordance with the conditions of the Agreement. The USETPA Administration Fee is calculated by multiplying the one to one and three fourths percent (1.0-1.75%) times the “Net Purchase Price”. The “Net Purchase Price” is defined as Vendor’s product list price, minus all applicable contract discounts (the 1.0-1.75% Administrative Fee may not be included), rebates or value added incentives, and excluding sales, use or other applicable taxes.
- Manufacturers responding to RFP may elect to pay fee on behalf of Channel Partners or require that approved Channel Partners be responsible for the fee.
- The Administrative Fee percentage shall be calculated as 1.75% for the first \$10,000,000 per calendar year for all categories of services and equipment procured through a USETPA Master Contract. For every \$10,000,000 in additional sales a Vendor sells in a single calendar year, the fee shall be reduced by .25% on those sales until the lowest rate of 1% is achieved. The fee structure shall be as follows;

Sales	Fee
\$0-\$10,000,000	1.75%
\$10,000,001-\$20,000,000	1.50%
\$20,000,001-\$30,000,000	1.25%
\$30,000,001 and above	1.00%

- The USETPA Administration Fee, along with a corresponding sales report, will be remitted quarterly in the form of a check or electronic payment (**Contact the Consortia Purchasing Advisors for the electronic payment information**) to:

- **Consortia Purchasing Advisors**

Attn: Reports Manager

5 Revere Drive, Ste 200

Northbrook, Illinois 60062

- Each remittance will include the time period covered including either a copy of the USEPTA Subscriber's correct invoice(s) or a data file including with all sales, dates, amounts and invoice numbers. The quarterly (calendar based) administrative fee shall be submitted by the last business day of the month for the previous quarter's actual sales (see table below). For example, the administrative fee for sales made in January-March is due by the end of April. A 1.5 percent (1.5%) per month charge will be added after the account is more than 30 days in arrears.

Sales Quarter	Report/Admin Fee Due Date
January-March	April 30
April-June	July 31
July-September	October 31
October-December	January 31

- **CONTRACT REPORTING REQUIREMENTS:** The Vendor/Dealer will be required to process quarterly usage reports via email to the CPA Reports Manager for all contracts. Report must be completed by the end of the month following the "sales" quarter. All "sales" must be reported. If "No Sales" are achieved for a specific quarter, then "Zero" (0) must be reported for that specific quarter. Failure to report the monthly activity by the 30th of the following month is grounds for cancellation of the contract, while not waiving any fees owed at that time or for the duration of any existing agreement between clients/subscribers and vendors. USETPA reserves the right to collect all owed fees at the expense of the vendor. If personal assistance is required, please contact the USETPA.
- Some contracts may require more stringent and timely reporting requirements, which must be met as specified separately
- Submission of Monthly Reports Email Address: **reports@cpadv.info**

Appendix J: USETPA Summary

US Educational Technology Purchasing Alliance

Summary

Mission:

To aggregate the demand for technology goods/services on behalf of K12 public and private schools, Head Start organizations, libraries, local government entities and all other public agencies to bargain for lower prices and better terms than most of these entities can achieve on their own and to lessen the time and expense of conducting local bids for good/services.

Subscriber status:

USETPA has issued RFPs and awarded convenience/master contracts to multiple vendors for the same service in order to achieve wide geographical coverage and to allow for vendor preference. Subscriber status is open to all eligible schools, libraries and public agencies at no cost. There is no legal obligation on behalf of any Subscriber to the alliance and there is no mandatory requirement on behalf of any Subscriber to use the contracts offered by the Alliance. Initially, bids were conducted in association with numerous professional organizations on behalf of all North Carolina K-12 public and private schools, Head Start organizations, and public libraries. The contracts have since been expanded to include local government agencies and used in 25 separate states. This RFP is specifically targeted to expanding the number of qualified vendors in additional sales territories as well as provide terms and conditions that comply with additional state purchasing laws.

When using USETPA contracts, Subscribers will not have to conduct their own bids for goods/services and will not have to file their own E-Rate Form 470's. This will save them considerable time and insure local boards that all proper bidding requirements have been met, including the best possible pricing for goods/services. Non-Subscriber entities are eligible to use the contract and be in compliance with the terms and conditions of the convenience contract providing that the sale is registered with the USETPA on the USETPA website and copies of all purchase orders are remitted to the USETPA. Only formal Subscribers may use the USETPA Form 470 for E-Rate purposes.

Products:

USETPA issues bids on behalf of its Subscribers for a comprehensive array of technology goods/services that include both E-Rate eligible and non-eligible goods/services.

The items covered include telephone, cellular, internet access, wide area network, hosted email, web hosting, and hosted VoIP telephone recurring services as well as equipment including computers, servers, switches, wireless and wired local area networks, cabling/wiring, tablets, and maintenance.

Individual RFP(s) have been issued to cover a broad category of products. Vendors are encouraged to respond to all or parts of each RFP. USETPA expects demand to be in excess of \$10,000,000 for most categories. Additional goods/services will be added as Subscriber status identifies new products for which they would like to receive bids. Future RFPs are planned for other goods and services including Office Supplies and Furniture.

To be apprised of future opportunities and receive RFP notifications, vendors are encouraged to register at www.usetpa.org.

Appendix K: Previous Responses

We wish to submit our previous response to RFP _____ as a response to this RFP, accepting all changes to terms and conditions as outlined in this RFP. This signed addendum must be received in a sealed envelope by the response date and time outlined in the RFP so that bid may be opened and scored as part of the sealed bid opening award process. Previous award does not guarantee award under the resulting contract from the new RFP.
